Good Health: Your Choice

Good health is really your choice. "Toxics" are now literally everywhere, even in nutritional supplements. In fact, in a 1999 test of 196 herbal products, a whopping 97½% were found to

be either toxic, ineffective or both. That means a mere 2½% (5 products out of 196) were found to be both non-toxic and effective. In contrast, you will find 100% of our products are both non-toxic and effective. Learn more about our premier products by visiting our website (www.healthline.cc) and read "10 Secrets" which tells how we do it.

Don't forget the toxics hidden in your food, water, household products and your environment. To avoid these toxics, careful choices must be made every day – what food and water you and your family will consume, the products you will use in your home, etc. But even with the best choices, you can only minimize your exposure to hidden chemicals.

The best solution is to ensure your daily protection with the Super Foods Trio: solid, all-bases-covered, toxic-free, premier quality nutrition. The Super Foods Trio offers broad-spectrum, "beyond organic" nutrients that support optimal health and well being for the whole family.* Combined with sensible lifestyle choices, the Super Foods Trio can help promote and maintain your great health for a lifetime.*
