Many models were reviewed and not included in this comparison because of undocumented performance claims. Some brands made exaggerated claims in their literature and on company web sites that did not match the "certified claims" on the product's "Performance Data Sheet". Only performance claims that have been certified by NSF, UL or the Dept. of Health were included in our comparisons. The water treatment industry is extremely regulated. Companies that market undocumented products, or make uncertified claims are heavily restricted as to how and where they can sell their products. Beware of products that offer different Performance Claims in different states. CA, WI, IA, and several other states, prohibit uncertified claims.
